

I spent one semester of Erasmus program at Universität zu Köln, Department of Geography. It was a really good experience. I attended classes in English such as Geographic Information System (GIS), Urban development of India and Human Geography of South Asia. Simultaneously I attended German course for foreign students (Deutsch als Fremdsprache). Before that I took pre-semester course of German language. It was really worth it because my German improved a lot. Atmosphere, teachers and equipment of Universität were great. I recommend it to all foreign students 😊
